Product Description

Product Description

PZ30 modular terminal combination electrical appliance is a device for installing terminal electrical appliances. Its main features are the modularization of electrical dimensions, installation rails, artistic appearance and safe use; it has been widely used at home and abroad.

PZ30 terminal combination electric appliance is suitable for the terminal circuit of single-phase three-wire or three-phase five-wire with voltage of 220V or 330V and total load current not more than 100A. It is used to control electrical equipment and protect overload, short circuit, overvoltage and leakage. A complete set of functions. It can be widely used in high-rise buildings, residences, stations, ports, airports, hospitals, theaters, large commercial outlets and industrial and mining enterprises.

Product Features

The main structural components of PZ30 terminal combination electrical appliances are transparent cover, upper cover, box body, installation track, track height adjustment screw, conductive bar, wire protection cover and electrical switch elements. The built-in electrical switch elements can be combined arbitrarily according to the needs, and the height of the installation track can be adjusted, especially for the concealed type, which is more convenient. Quick and easy disassembly, safe and reliable use.
