The meter box has different specifications and applicable occasions. Choosing the right meter box can give full play to the product's maximum function and efficiency. At present, the watch boxes on the market mainly have three types: plastic material, glass fiber reinforced plastic material, metal material, and so on. The stainless steel meter box is made of cold-rolled steel plate or stainless steel plate by bending and welding. The upper and lower sides of the shell are equipped with movable knock-out holes, and cover sealing measures are adopted. The grounding terminal is installed inside the box to facilitate the wiring of the terminal box.
