Product Description

BV1-C

Series Surge Protective Device

BV1-C series surge protective device (SPD) is suitable for TN-S TN-C-S TT IT etc. power supply system of AC 50/60Hz, 380V, installed on the joint of LPZ1 or LPZ2 and LPZ3, it's designed according to IEC61643-1 GB18802.1, it adopts 35mm standard rail, there is a failure release mounted on the module of surge protective device. When the SPD fails in breakdown for over-heat and over-current, the failure release will help electric device separate from the power system and give the indication signal, green means normal, red means abnormal, it's also could be replaced for the module when has operating voltage.

Product Feature

Inside over-current and over-heat protection, temperature control open circuit.

Module design, convenient installation, could be replaced online.

Smallness leak current, response quickly, less residual voltage.

Signal indication device, green (normal), red (abnormal).

New technology, highly energy, clearance discharge pole (N-PE)
