## Product Description

### Product Description

#### Application

The series of fuses are mainly used in circuit of AC 50Hz, rated voltage of 1000V and rated current 1250A, to protect the semiconductor components and the whole unit from circuit short.(aR).

The breaking capacity of the fuses is up to 100KA.

The fuses are compliant with the IEC60269-1, IEC60269-4, IEC60269-4-1 and GB13539.1, GB/T13539-4, GB/T13539.7 standards.

#### Design Features

The variable cross-section fuse element made from pure silver sheets are sealed in the melting tube made of high-density porcelain. The fuse tube is filled with chemically treated high-purity quartz as arc-extinguishing medium. The two ends of the melting body are connected to the knife contactor by dot welding. Both knife contactors and board contacts are available. A striker/indicator may be installed to the fuse links. When the fuse link breaks, signals are sent out in the case of an indicator, or the switch is pushed to cut the circuit in the case of a striker.
