## Product Description

### Product Description

Square body fuses are a perfect solution for the applications that require a compact design and excellent reliability performance. Square body fuses have a variety of installation methods, the flush-end style has become a very efficient and popular high speed fuse style due to its installation flexibility. This style is also selected because the current carrying capacity is the most efficient of all fuse types.

The 580M series fuse is made in domestic 100%, with the protective features of aR, and it is used for protecting the power system from overload and short-circuit. This series products are equal to the same type of products 170M, RSF, RS4, RS8, RSH, RSG, RST, RSM. It keeps the same electrical protection features with the foreign fuse, and can swap installation dimensions. It is one of the key components that china power grid could realize localization.

Golden's Flush End type square body fuses are specially designed to mount the fuse with busbar directly. Chifeng provides optimal circuit protection for power semiconductor applications with the extremely fast speed.

### Application

Power conversion devices  
Dc systems  
Electric vehicle charging stations  
Heaters and power supplies

### Product Features

Excellent current cycling performance  
Flush end Mounting  
Direct bus-bar mount design  
Various indications and microswitch

### Product Parameters

Model Number	580M Flush end fuse
Voltage	Up to 1500V
Current	Up to 2000A

Breaking Capacity 100kA  
 Time constant 10ms  
 Operating class aR  
 UL® 248-13, Guide  
 Standards/Approvals JFGA,
