Product Description

Product Description

- 1.12V/24V system voltage automatically recognized.
- 2.Maximum Power Point Tracking technology,the tracking efficiency can be high as 99%
3. With temperature compensation employed, charging parameters can be automatically adjusted.
- 4.The controller is equipped with an LCD screen with which users can not only check device operating data and status, but also modify controller parameters.
5. Featuring a temperature compensation function, the controller can automatically adjust charging and discharging parameters in order to extend the battery's service life
- 6.GEL,Flood,Lead acid,SLD.

- 1.**[Wide Compatibility]**The solar charger controller is compatible with 12V or 24V system automatically, suitable for lithium battery. Dual USB 5V output ports support mobile phones, tablet PCs or other devices that require 5V voltage.
- 2.**[Reliable Protection]**Solar charge regulator provides over-current protection, short-circuit protection, inverse connection protection, low voltage and overcharge protection, a reliable protector for your devices.
- 3.**[Intelligent Controller]**Build-in industrial microcontroller for automatic management, memorizing various parameters set by the user and the data won't be lost when the battery runs out.
- 4.**[Digital LCD Display]**Intuitive LCD display that can clearly indicate the status and data is able to switch modes and a parameter configuration, suitable for home, industrial, commercial, etc.
- 5.**[Easy to Use]**The charge controller should connect the battery first, then the solar panel, and finally the load! You can change the settings by the simple one-button operation.
