Product Description

Product Description

Solar outdoor flood light **Outdoor garden use waterproof flood lighting 100W 150W 200W 250W 300W**

The home series floodlights are suitable for outdoor use to avoid wiring, and the advantages of zero installation are spread throughout every home. This new type of solar flood light introduced by our company has 180-degree human body induction, and the induction is 8-10M. Traditionally dominated by polycrystalline solar panels, our design prefers to use high-efficiency monocrystalline solar panels, which converts electrical energy faster. It is easy to disassemble, easy to maintain, and more worry-free. The waterproof level is IP66, which can better prevent foreign objects from invading, completely prevent dust from entering, and can withstand strong rainstorm impact. The shell adopts 1.2MM thick die-casting aluminum shell, which is better than the traditional compression resistance and the sectional heat dissipation is faster. In addition, we also designed an intelligent light control mode, which automatically charges during the day and lights automatically at night to meet a variety of usage needs.

Screw Buckle Explosion-Proof Glass Senor Module Reflecting Shade Lithium Battery Led Aluminum Frame Movable Support

Main Components

Monocrystalline silicon solar panel
High Luminoud LED
Intelligent controller
High Quality Lthium Iron Phosphate battery.
