Product Description

Product Description

This is a rotary switch disconnecter, for line connection is disconnected and isolated line maintenance or maintenance load.

A support portion comprising a movable contact, drive means, stationary contact, the housing, the wire holder, the base, since the helical gear, to achieve dynamic and static contact closing and opening configuration, while using as a spiral spring energy storage spring , Can ensure fast closing and opening speed. The product has good stability and strong on-off capability. In addition, this product not only allows the operator to clearly see the opening and closing of the moving and static contacts, but also prevents unrelated personnel from accidentally closing and closing. It has the advantages of reasonable design, ingenious, safe and reliable, convenient and practical, and excellent performance.

- 1.Rotary Isolator switch applied to circuits of AC 50Hz/60Hz with working voltage up to 440V and rated working current up to 150A.
- 2.Rotary Isolator switch is suitable to control: air-conditioner, water pump and ventilating equipment, and AC motors with small power.
- 3.six current ratings: **16A,20A,25A,32A,40A,63A,100A,125A,150A.**
- 4.Rotary Isolator switch has the finger protection terminals, which offers an extra advantage.
- 5.Larger insulation distance, quick disconnecter response. And is a good choice For AC DC circuits.
