Product Description

Product Description

Universal conductor terminals are used to connect conductors with cross-sections extending from 1.5~120mm² to busbars with a thickness of 5 or 10mm. Installation is simplified by integrated retaining springs, open terminals and captive screws.

For connecting round conductors 95-300mm² and flexible copper busbars. The clamp-type terminals enable the busbar to be gripped completely and conductors to be connected without drilling.
